*Microplastics are a huge problem everywhere and have a considerably negative effect on all living creatures including humans. To have a plastic recycling facility in our town is simply not acceptable.*

*While we are told that systems will be put in place to manage air and water pollution, systems are only ever as good as the people who manage them.*

*One of the people involved in Plasrefine has [REDACTED] regarding failing to keep environmental emissions regulations and even apart from this there can be accidents when systems break down.*

*While I realise Australia needs to deal with its own waste, such a facility should be located very far from human habitation and be run by people with proven pro-environmental leanings.*

*The current proposal is absolutely unsuitable.*
