Location: New South Wales 2577	
Attachment: N/A	

Submission date: 11/17/2024 7:59:25 PM

With the elevation of the local area, it is often windy 95 percent of the time and I do NOT want to be a prisoner in my own home, our family always sit out and enjoy a cup of tea/coffee with a beautiful outlook.

A chimney stack with toxic fumes pumping out into the atmosphere will cause detrimental health problems to residents and local wildlife which are in abundance and the platypus which is endangered in the local waterways as plastic waste will end up in the water and all of the Sydney water supply making it undrinkable.

The 24/7 noise from trucks/traffic as well as the noise generated from the recycling plant will also affect sleep pattern, where are our rights as tax payers!

A facility such as PlasRefine will have massive realestate effect and cause house prices to tank effecting the local economy.

A facility such as PlasRefine needs to be out of the way and near a motorway for easy access, how has the IPC and state government allowed this to pass all tests near schools and residential area with no buffer zone. Is our government complicit in corrupt dealings.
