Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses), Traffic, Other issues</i>	
Location: New South Wales 2576		
Attachment: N/A		

Submission date: 11/18/2024 6:10:36 AM

The proposed recycling facility is clearly unsuitable for a residential community, and I feel compelled to speak out as a concerned resident. We moved to the Southern Highlands seeking the peace, clean air, and the ability for our children to play outdoors in a safe, healthy environment. The risks posed by this facility would undermine all of that.

Several critical issues have been raised in various submissions, including:

Environmental Impact: The facility could lead to fine particles being carried across the district by wind, potentially harming the air quality we moved here to enjoy.

Health Risks: There is troubling disregard for the health of local residents, including our children, who deserve to live in an area free from harmful pollutants.

Misleading Plans: The facility's submitted plans omit key features, such as smoke stacks, which could significantly impact the local environment and public health.

Substandard Air Filtration: The proposed air filtration systems fall short of the standards needed to protect the community's well-being.

Fire Hazards: The design of the facility introduces extreme fire risks, which have not been adequately addressed.

Traffic and Infrastructure Strain: The constant truck traffic would place undue stress on our already fragile road infrastructure, creating noise, congestion, and safety hazards.

Environmental Neglect: There is a complete disregard for the preservation of the local environment that makes this area so special.

[REDACTED] providing no local economic benefit.

Inappropriate Location: The Moss Vale site is entirely unsuitable for this type of development.

As a family that sought out this beautiful region for its clean air and outdoor lifestyle, we cannot stand by while a project like this threatens the very qualities that make the Southern Highlands such a wonderful place to live. For the sake of our children's health, the local environment, and the community's well-being, this project must be stopped. The proposed development at Moss Vale is simply not appropriate for this area.
