*Opposition to Proposed Plasrefine Plant in Moss Vale.*

*I strongly oppose the proposed construction of a Plasrefine plant in our community. This submission outlines my concerns regarding the potential environmental, health, and social impacts of such a facility.*

*Environmental Concerns*

- 1. Air and Water Pollution: Plasrefine plants emit hazardous chemicals, particulate matter, and volatile organic compounds, posing risks to local air and water quality.*
- 2. Greenhouse Gas Emissions: The plant's operations will contribute to climate change, exacerbating existing environmental challenges.*
- 3. Waste Management: The facility will generate hazardous waste, potentially contaminating soil and groundwater.*

*Health Concerns*

- 1. Cancer Risk: Exposure to toxic chemicals released by Plasrefine plants increases cancer risk for nearby residents.*
- 2. Respiratory Issues: Air pollution from the plant will aggravate respiratory conditions, such as asthma.*
- 3. Neurological Effects: Chemical emissions can cause neurological damage, affecting cognitive function and overall well-being.*

*Social Concerns*

- 1. Decreased Property Values: The presence of a Plasrefine plant will lower property values, affecting local residents' quality of life and economic stability.*
- 2. Community Character: The industrial facility will alter the community's character, potentially driving away businesses and residents.*
- 3. Public Safety: The plant's operations pose risks to public safety, including explosions, fires, and chemical spills.*

*I advocate for:*

- 1. Renewable Energy Investments: Encourage sustainable energy sources, reducing reliance on polluting industries.*
- 2. Waste Reduction Strategies: Implement waste reduction and recycling programs to minimize the need for Plasrefine facilities.*
- 3. Community Engagement: Engage with residents to develop environmentally responsible and economically beneficial alternatives.*

**New South Wales Government**  
Independent Planning Commission

*I urge you to reconsider the proposal for a Plasrefine plant in Moss Vale. The potential risks to our environment, health, and community outweigh any potential economic benefits. I demand a safer, more sustainable future for our community.*

*Regards,*
