Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses), Traffic, Other issues</i>
Location: <i>New South Wales 2074</i>	
Attachment: N/A	

Submission date: 11/19/2024 7:47:59 AM

This development is going to be a huge mistake and if passed once the damage is done there will be no coming back from it. The negative impact this development will have not only in the Southern Highlands but further afield is going to end up being a tragedy and will go down in history as one of the biggest blackest days in NSW history. These forever PFAS chemicals will impact wildlife, waterways, quality of air and of course humans. This just isn't the right site for this development. The negative impact this development will have on the local community is also a tragedy. People have chosen to live in a rural place for a reason and this is being taken away. I honestly do not understand how we have reached this point, I cannot believe that this development hasn't already been shut down the the owners told a firm NO. You don't need to be a scientist to understand the forever damage these chicks will have on everything. What's sad is the government and leaders should be finding ways to ban plastics not just the token ban on plastic bags or straws. But a full ban but we know it will never happen as there's too much money in it so instead we destroy the world slowly but surely. Anyone who actually thinks this development is a good thing needs their head read and will be responsible for the horrific lifelong forever impact this will have. Please do the right thing and say no.
