As a member of the local community I strongly oppose this development.

As a mother of two young children and a healthcare worker for over 20 years I oppose this development.

You can not guarantee the health and safety of this development for locals and our air and water quality. I fear for my children and the many young people that I work with, and the impact it may have on them.

I fear for the impact on our beautiful local environment and ecosystems.

Telling people to spend more time indoors to avoid pollution (as the company have stated) is absolutely ridiculous and unachievable.

Whilst I don't oppose the recycling of plastics, in fact I strongly support it, this is NOT the right location. There are too many risk involved that could have devastating and long term impacts on our community, peoples health and the environment.
