*It is madness to even contemplate locating the Plastrefine factory in an area close to, residential homes, schools, waterways. A factory which potentially uses and then produces harmful chemical waste as a by-product.*

*Beside the possibility of polluting the Sydney water supply, another major concern should be the possibility of an accidental fire.*

*Moss Vale is a growing community but does not have the infrastructure to cope with a possible emergency which could happen in case of fire at the proposed factory.*

*Recycling is to be encouraged but not at the expense of the residents, and other clean factory*

*Developments in the area.*
