I oppose the building and running of the proposed plastics refining/recycling plant in Moss Vale

The facility will negatively impact the environment of the Southern Highlands.

Potential impacts include air pollution with toxic chemicals if strict quality control is not maintained or if mechanical breakdowns occur

Contamination of groundwater, and then rivers, is another possibility. The water in the rivers of the Southern Highlands not only supply water to communities here but also are part of the water catchment for Greater Sydney.

In the driest inhabited continent we cannot afford to endanger the safety of our water supply

An increase in traffic through Moss Vale is a further concern. Moss Vale roads are extremely busy. Trucks would adversely compound an existing and vexing problem.
