I object to this plastic refinery being built in moss vale as this is too close to the residential area, schools and business establishments where people goes. This will make the traffic around the moss vale and surroundings more worser. We want our kids and ourselves to enjoy being outside. The reason we are in dispute with this recycling factory is because the proposed location is making us concerned about pollution and the habitats of other animals so as long as it doesn't interact with the habitats, towns and city's moving it to a better place would be a intelligent idea.
