My concerns are the site suitability, This site is not suitable as there is

No buffer zone between land uses results in land use conflict

And the Use of Braddon Rd which is a Residential road. Truck movements etc not acceptable

Major Vehicle Impacts (High numbers of trucks and associated vehicles daily) our roads are already struggling under current use let alone adding these daily movements to them

Moving the rail crossing which will impact other future and existing businesses and the design of the Southern highlands.

The Bulk and scale of this - it is way too big for the

However one of the main concerns is the risk of microplastic emissions (both in air and water) and the impact on human health ..and the effect it would have on our growing children and their future. Staying inside If we are concerned about air quality is not an option (as they have suggested) we live in a rural area where people and fauna co exist and enjoy the outdoors koala's, platypus's, echidna kangaroos, wallaby's, birds and frogs all live in this area too..
