*I am a local farmer in Burrawang and my heart goes out the families and businesses that will be directly affected and harmed by such a proposal. The state government should be ashamed that they cannot find a more remote location that will not cause so much harm. I object to the proposal due to the close proximity to residential homes and families who will be impacted. Asking families with young children to limit their exposure going outside is unacceptable. Looking at the long term affects and future litigation when people start getting sick is something any business needs to consider very carefully. Also driving families out of the area is awful and unethical. Also we all know no matter what measures this factory put into place there will be spillage going into the soil and water which will affect the quality of drinking water as well as local farm land. Is there a reason why the plasrefine website is no longer online? If this proposal goes ahead it will only lead to sickness of people and the environment which will then force the plant to eventually close. find a new location away from people and farmland. Goodness you would think there are smarter people in government who would be able to see this. Surely!*
