The importance of keeping our waters and environment safe in the highlands is imperative. There are young children in care a matter of metres away, as well as families.

The traffic issues alone are horrendous- anyone who lives locally can attest to the sheer amount of traffic that cannot move through moss vale already. The planned site is far too close to townships and populated areas.

Pollution to the air and waterways for future and current generations just to make a buck is disgraceful.

There is clear scientific data available to speak to the issues that plastics cause in our waterways, killing wildlife. There are more and more families moving here for a tree change, meaning more and more potential impact. Choose another site, away from populated areas.
