*Not good for my health or my families health. We are 25 with a house in new berrima with a small family of 3 including a 2 year old. We have just recently bought and cannot imagine the damage this will do to our lungs plus the the damage from the cement works already affecting us. The value in our house will be reduced from this development causing us to be in so much debt that we couldn't even sell our house for to make money back even after all the Reno's we have done. Please re think of this and move somewhere else. It's beyond ridiculous that this is even something I have to put in writing to say don't build. We have a beautiful community and I can't imagine having more and more trucks along this road with such young families being around here it's asking for trouble.*

*To the people building this how would you feel to have your family you love and care about especially there health and safety absolutely destroyed living next to a giant polluting [REDACTED] that says don't go outside because of the pollution. How in this day and age can you say that is okay. The pollution once again from the cement works which has caused damage to our not even one year old car that we have spent so much money on and getting wax protection on is now ruined from the cement works I can't imagine how good it is for our lungs. I moved here as this is all we could afford in this crazy highlands market that suited our needs but neither did I think the pollution from the cement works would be this bad. Now add a giant plastic plant on top of what we already have. As someone who understands and study's soil I can't imagine what it has been doing to our soil over the years with the dust floating around. The microorganisms in our soil and water ways that help benefit our way of life slowly becoming worse and worse and yet no one does anything about it. You now want to make it even worse with this nonsense is beyond belief.*

*Put your family into this and see how they would feel about living in this area with that.*
