The Southern Highlands is a country area that we all decided to live in or grew up in and have stayed because of its beauty and fresh clean safe air far away from hustle and bustle of the big city's smog areas.

Over the years I have been here the Highlands have increased in people and traffic including Moss Vale. We go on walks and drives around our areas and spend time outdoors to enjoy.

If this Plastics factory gets built with all the toxic particles and smoke and the many truck fumes per day how are we able to go outdoors to enjoy our life (as they say we have to limit the times outside) not to mention the damage to our already bad roads the the council cannot afford to repair!!!

Is the company going to pay for the repairs to the roads, and the traffic bank ups at the railway crossing on Berrima road??

I have asthma and we moved down here to get fresher air, we put all our savings and super into buying this home in the hopes that when we pass on then my children will get some money of the house(not if the prices of houses go down due to no one wanting to move to Moss Vale.

We need a answer to the plastic wastage and recycling BUT NOT IN THIS PLACE.

Go somewhere near a railway line so that they can transport this on trains like other company's do(like Breville built a warehouse on a rail line so no trucks were on the road .Port Kembla is industrial and is on the coast so you can transport by sea.)

PLEASE NOT THE RIGHT SITE
