*I support the development on a number of points one being that the Wingecarribee local government area needs more economic diversity. Covid showed us that the local area is heavily reliant on tourism and hospitality with very little diversity of industry. Having a diverse industry base will better allow the region to weather economic adversity. Another point is It will provide a diverse range of occupations from processing, engineering, maintenance, admin etc. Finally i think The State and Australia is crying out for more recycling infrastructure, we cant keep exporting our problems. Australia needs this plant and it has to go somewhere. I think with the right conditions and approvals we will end up with a world class recycling plant that is an asset to the region. Thankyou.*
