Dear bureaucrats, I am at a loss as to how this project is even considered for its current location, so close a thriving pollution free community of heritage value. The proponent is seeking to take advantage of existing infrastructure to operate an industrial scale facility of huge proportion via a minor country road! It is highly in appropriate at this location.

For the "recipients" of all the negative impacts especially concerning air pollution to be generated by this facility, to "spend more indoors" smack of the village idiot being in charge of the document!

I still remember my time in Hurstville in the 70s where "containers Ltd", a large printing firm was the emitter of significant air pollution until it was finally shut down.

The residents of Moss Vale deserve better, when this type impact can be easily avoided by assigning another site, far away from any settlement of any type, can be and should be made. Let the proponent build its own roads and infrastructure and not be a parasite on the existing infrastructure already paid for by the local and wider communities .

Thank you.
