It is quite clear that this is not the right site for the proposed development of a plastics processing plant. It does not have support from the local community. In fact, it has vehement opposition. The traffic impacts with 100s of truck movements will greatly affect the local community that simply doesn't have the infrastructure to accomodate it. The health impacts are of real concern. The proposed mitigation strategy of locals 'limiting there time outdoors' is laughable and should, on this point alone, render this project unsuitable. The future impacts of this facility on the water catchment is of significant concern. The impact on surrounding farmland is of significant concern. The health impacts on residents is of significant concern. This is a project that will have a significant and detrimental impact on the Moss Vale and Southern Highlands communities and should not be provided approval.
