My objection & concerns to the Plasrefine proposal are based foremost on the long term detrimental health factors to the local community as well as the impact on the surrounding environment, flora & fauna.

This proposal will change the landscape and potentially contaminate crucial waterways.

The pollutants produced by Plasrefine will undoubtedly affect not just the general health but also the mental health of the local community. To ask locals to limit their time outdoors (to avoid breathing in toxic air caused by Plasferine pollutants) is extremely unreasonable.

The Southern Highlands & Moss Vale are synonymous with pristine views & clean country air. The Plasrefine proposal will alter this forever.
