This is my second submission objecting to this proposal as other issues have now come to my attention.

I read an article in our local paper (Southern Highlands Express) by a person who said that he, being a civil engineer/builder and a chemical engineer associate, looked at recycling plastics in the 1980s. So he has experience and stated that it is a world renowned "no profit" exercise in satisfying the greenies and the ignorant masses into thinking they are saving the planet.

Apparently only some plastics can be recycled and at great expense. This person also said that the proposers want government (taxpayers) financial assistance. What a farce!! a foreigner comes to our country buys land in a very unsuitable position intending to set up an unprofitable industry, asks for our money and all to make the uninformed and the city dwellers feel warm and fuzzy.

Our community is devastated by this proposal and I hope you will take into account our feelings. The general consensus is that the decision hasn't already been made and you are just playing us along. I SINCERELY HOPE THAT IS NOT TRUE
