*I object to the proposed plastic recycling refinery in Moss Vale on the following grounds:*

*Proximity risks: Residential areas (200m), ABR facility (50m), and schools (2km radius) face fire, health, and environmental hazards.*

*Heavy traffic increases noise, air pollution, accidents, and road degradation.*

*Air and water pollution risks from system failures could release hazardous toxins.*

*Threat to endangered species, including microbats, platypus, and vegetation habitats.*

*Risks to local waterways from microplastic runoff affecting drinking water sources.*

*High fire risks with insufficient local firefighting resources.*

*Negative impacts on tourism, local industries, and property values.*

*Long-term inefficiency of plastic recycling and environmental concerns.*

*Need for focus on reducing plastic waste at the source.*

*Regards*

*Sarah Novati*
