*My prime objection is the impact of the operation on local traffic flows and in particular greatly increased heavy vehicle traffic required to transport input materials.*

*The facility should be situated in an industrial area with existing road structures suitable for heavy vehicles*

*Ideally rail access would be possible*

*Regardless, the operator should ( upfront) contribute to road improvements to alleviate these issues.*

*Access to a Moss Vale site should be from an upgraded road corridor from and returning to the Berrima access points on the Hume freeway.*

*No heavy truck traffic should be planned to pass through Mittagong, Bowral on what is an already overloaded corridor*
