I object to this development for the following reasons:

1. The environmental impacts will be numerous. The emissions resulting from the refining process will result in a high level of pollution and particulates. The wind in the Southern Highlands predominantly comes from the west, and this will therefore impact residents and communities to the east of this facility. There will also be plastic odours emitting from the facility which will detract from the rural environment that residents are used to.

2. There will be a significant increase to traffic in the area.

3. There will be a considerable visual impact on the Southern Highlands, and a building of this size will be highly visible and will detract from the bucolic nature of the Southern Highlands.
