*I am opposed to the proposed site for this plastics facility for a variety of reasons, including the impact of micro plastics in the air of nearby schools (of which they are under 5km away).*

*The land is a 100year flood zone and the impact of microplastics entering into water which directly feeds into a major water supply is also of significant concern. The health and wellbeing of the community should be considered, and this facility will have a significant negative impact on them.*
