Location: <i>New South Wales 2577</i>	
Attachment: N/A	

Submission date: 10/24/2024 5:17:43 PM

Some of my concerns:

"It is understood that Plasrefine aims to treat its own wastewater" - not good enough, we need to have in writing that it is a requirement that they WILL treat their own wastewater. The devastation to the surrounding waterways, Sydney waterways and wildlife from this facility if allowed to proceed will be felt for generations to come.

The huge amount of trucks and employees cars going in and out of this facility each day - the doors will be open far longer than they are telling us - so with the notoriously high winds in this area and indeed in the Southern Highlands, how are they going to contain the plastic inside their facility? It's impossible!

I am not against recycling but THIS IS NOT THE RIGHT SITE for a plastics recycling facility.
