This site is in a possible flood zone and the risk of floodwaters carrying plastic or microplastic waste into a major drinking water catchment alone makes this site unsuitable for the proposal.

As a parent of young children, I am extremely concerned about the health and environmental risks of microplastics in the air and water of the Shire.

Further, this is a rich grazing and agricultural area where food is grown not just for my community but around Australia and abroad. This food could potentially be contaminated with microplastics affecting consumers here and further afield.

Finally, I am concerned about the amount of traffic from 7/day trucks and pollution output so close to a residential area which includes a childcare centre.
