We strongly object this development completely. We have 3 young children who will spend the next 7+years (8+ hours a day) every day breathing in the air within the moss vale school that they attend. We will be spending weekends at moss vale sporting fields breathing in this air. Alongside the impacts it will have for the already congested traffic, the potential health issues and future legal implications this will have for the company but also the local/state government for allowing such a development so close to and impacting thousands of people and young children is unfathomable.

This development must be denied.
