I object to the proposed Plasrefine facility operating at Moss Vale. It will have a severe impact on the air and water quality for the local area and could have a very negative effect on both flora and fauna. The release of particulates and the residual effect of their concentration will invariably cause long term environmental harm to the residents of the Wingecarribee Shire and beyond as this is a water catchment area for Greater Sydney.

Heavy traffic, particularly around New Berrima and surrounds will increase and cause worse congestion, noise pollution and damage to infrastructure and compromise it as a beautiful rural setting.

It is for these reasons I am opposed to this development.
