Location: New South Wales 2577	
Attachment: N/A	

Submission date: 10/21/2024 11:59:30 AM

I will keep it short and brief, because the list is endless as to why this factory shouldn't be built.

- plastics can not be recycled, they turn to micro plastics that will get into the air and cause cancer for the community that will breathe it in. Generations will see increase in infertility, abnormal births etc.

- the factory waste will be disposed of in the nearby Wingecarribee river, that supplies water to Sydney. Allowing for to city to affect the whole cities quality of water! Real Erin Brokovich case repeating here as I and many others see it!

- the owner is unqualified for running this type of factory, [REDACTED] affecting the health and living conditions of our local community. Absurd!

- traffic, noise, killing off the mouse factory next door, new roads built they are the least of our troubles in face of what I have highlighted about the health and ethical impacts this will generate.

Does no one [REDACTED] cancer! Lung disease! Infertility! Selling out to the [REDACTED] Water supply contaminated!!! It doesn't take a rocket scientist to understand you cannot dispose of plastic like this!
