*I strongly oppose the approval of this project. This is not a safe business to be running just up the street from my daughter's day care. She is 3 years old and immune compromised.*

*- This factory will see hundreds of trucks coming past our Centre every day, carrying plastic waste from Sydney, Canberra, Wollongong, Goulburn and beyond.*

*- There is LOADS of research about the danger plastics pose to our health €“ communities near plastic production and waste disposal sites have increased risks of premature birth, low birth weight, asthma, childhood leukaemia, cardiovascular disease, chronic obstructive pulmonary disease, and lung cancer. Infants in the womb and young children are at particularly high risk.*

*- The Highlands is windy! And waste and microplastics and pollution will be carried from the factory all over our community*

*- The company proposing this factory is \*\*\*\* owned, so there will be no profits or benefits from the business feeding back into our community. Most of the jobs will be automated. This is a grave health risk to our young children, the workers of this chilcare centre, the surrounding property owners, or anyone within 50kms of this area due to the inevitable spread of microplastics into our waterways, the air we breathe, national parks & recreational parks. It will compromise the health of all people & wildlife in the region. Please give the people of the are a chance to fully understand the impact such a facility would make on the community and the time to be able to respond.*
