This is a disaster in waiting for the local community. There is so much land available in less populated areas in this state and you are choosing to build it near homes and residential properties. You are also completely ignoring the natural environment in the Southern Highlands and choosing to pollute it for the sake of profit.

Please do not go ahead with this abomination. We are not prepared to pay with our health so that the government and the political establishment can tick a box for the sake of the green movement. The real green movement is in the way we live here. Not in building more factories and polluting the land even more.

You will end up with a higher level of cancer and other health issues as a result of this.

I invite the owner of this proposed business to live next to it if there is no impact. I doubt a single person supporting this or in the approval committee would ever live in the area.

Thank You.
