*I strongly oppose the proposed Plasrefine waste facility. Scientific research has shown the serious health consequences that these facilities have on the surrounding population and environment. Plastic resin compounds cause cancers, respiratory diseases, and other serious health conditions. The proposed site has waterways that flow directly to a drinking water catchment, is only 150 m from homes, and is close to 2 schools and an early childhood centre. Plasrefine has not disclosed the synthetic additives that will be used in the recycling process.*
