as a resident and a mother of 4 children who attend school within the community and who be directly impacted by the pollutants should this proposal proceed, I am writing to express my significant concerns and objection to this proposal.

there is significant concern around the increased health risks - air pollution and increased risk of respiratory issues, exposure to harmful chemicals through air, soil and water contamination and pollution. The potential long term environmental and health impacts would be devastating. Impacts of concern include:

- water contamination impacting the wildlife as well as the quality of our drinking water*
- significant air pollution with toxic fumes and leaks from micro and nano plastics*
- the significant infrastructure burden and traffic build up which not only impacts the community residents moving around, the safety of pedestrians but will significantly impact the air quality with increased traffic fumes also.*
- increased risk of toxic plastic fires*
- the negative impact on agriculture, tourism through seepage of toxic chemicals into food and farming land, cattle and horse studs, function venues and local tourist attractions.*

Given the significant health risks and environmental impacts associated with this plant, I do not support this proposal.
