I am objecting to this development. I have listened to various community meetings and read the DA and it is clear the prevailing wind will ensure bits of plastic will be blown around the community.

Fine plastic pollution will also get in the local waterways - which has a direct link into the riparian system and Wingecarribee river and, in turn, into Sydney's drinking water supply.

In addition, the multiple truck and light vehicle movements will have serious impact on the already congested and broken local road networks.

I would also like to understand if there was a visa approval to the overseas owner of GHD on the understanding GHD would invest a certain amount of money into this factory.

This proposal also impacts the Southern Highlands Innovation Precinct - why would a tech start-up move next to such a monstrous industrial set-up?
