*I have worked at Southern Highlands Early Childhood Care for 14 years and our philosophy is to cherish and nurture children to fulfill their full potential. I believe if this is approved it will have a devastating effect on our children health and wellbeing from the pollution, traffic and environmental impacts. As a young mother I also believe it will have an impact on young girl reproductive developments along with any other long term health effects which may occur later in their life. Our children will not be able to enjoy a clean and healthy environment whilst playing outside, our roads and infrastructure are also not built for the amount of traffic ie-trucks, our families already have some difficult times with speeding up and down this road, by adding 100's of trucks this will impact the safety and security of our children, family's and residents.*
