Dear Commissioners,

I would like to make an objection to Plasrefine because the plastic that would go into the air, the water and the ground will end up at my place, in the river and in the air.

There was a platypus found dead in the Wingecarribee river at Berrima and it had PFAS in its liver. Now imagine how that is going to effect the animals that drink out of the water, the little children that accidentally drink the water and the future of the river.

If you stop Plasrefine, you will keep the river a beautiful place and if you don't, the people who swim in it will find little bits of plastic in their bodies and we already have a golf-ball worth of plastic in our bodies.

Please do not commission Plasrefine. The people and the animals all depend on you.

Yours sincerely,

Barney Mathews

Resident of Berrima.
