I strongly oppose the Plasrefine development in Moss Vale on the basis that it is not in the best interest of our community.

This development will be detrimental to our community due to the toxic chemicals that it will create and introduce into our air and our water.

These toxic chemicals are dangerous to our health and we should not be forced to breath them in or for our water to be contaminated .

I am also worried about the increased traffic of heavy trucks on our roads that are already under pressure.

The negative impact the development on our environment will be horrendous.

Please to not approve this proposal as it will cause damage to our community from which we will never recover.
