*I object to the Moss Vale Plasrefine development going ahead for countless reasons; but here are the top 3:*

*1. Plasrefine have themselves recommended that residents neighbouring the site limit their time outdoors. This in itself should be the only argument required! this not only confirms suspected health implications for them and residents beyond, but surely also impedes on their basic human rights to be able to spend as much time in or outdoors as they like given it™s THEIR properties.*

*2. Echoing the sentiment of Ms Hordern regarding the patented solution that will be used to clean the plastic: æThere are no standards in Australia for such mixes, and the risk of toxins emitted by this process to our waterways and air is just too great for our Southern Highlands and the wider environment."*

*3. Based on fires that have taken place at other plastic recycling facilities locally (Hume, ACT / Kempsey, NSW) it is common clear that 3 local trucks will not suffice to contain a likely blaze. This not only puts the surrounding area at risk, with toxic smoke capable of travelling far and wide across the district.*

*<https://www.facebook.com/share/v/15ZBcMSyov/?mibextid=KsPBc6>*

*Find another location for this recycling plant. MossVale is NOT THE RIGHT SITE!*
