Submission to Object to the Plastic Recycling Plant Proposal

I strongly oppose the approval of a plastic recycling plant in this culturally, touristic, and environmentally significant region. This proposal threatens to disrupt the delicate balance that defines our community, endangering both its cultural heritage and the natural environment.

This region's cultural identity, built over generations, attracts visitors and provides a deep sense of belonging for its residents. Introducing an industrial facility of this nature risks irrevocably altering the character of our community, undermining its appeal as a cultural and tourist destination.

Moreover, the environmental consequences cannot be overstated. Such plants often introduce risks of pollution to air, water, and soil, potentially damaging the unique natural landscapes that we cherish and rely upon for our economic and ecological well-being.

We must prioritize sustainable development that aligns with the values of our community and protects its unique cultural and environmental identity. I urge the decision-makers to reject this proposal and explore alternative solutions that do not compromise the very essence of what makes this region special.

Sincerely,

Gabriel Aguilar
