The recycling proposal is not appropriate for a residential area with considerable income derived from tourism. The pollution with unpleasant, possibly harmful, smells drifting over Moss Vale and other Highlands towns on the prevailing westerly breezes, the numerous trucks moving along roads between homes and the impact on property prices will detract from local peoples™ lives. Furthermore I am not reassured that the plant will be rigorously up to standard.

This proposal should be rejected and the search started for a site further from residences and in a less densely populated area. It is a essential process to be undertaken in Australia but a thorough examination of this proposal should surely result in a rejection.
