I can't understand when us farmers are having to implement infrastructure and practices near water catchments, creeks and streams to ensure the purity of our regions drinking water for the benefit of our community as well as Sydney's water supply. We are being encouraged to fence off our water ways, plant trees etc to ensure there is no contamination from our livestock or machinery, while being prepared to allow a company to start up with a serious risk of contamination of the waterways and purity of drinking water. Also the increased traffic in the area on existing roads around Berrima will be cause a big detrimental effect on residents, roads and infrastructure.
