Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses), Traffic, Other issues</i>
Location: New South Wales 2575	
Attachment: N/A	

Submission date: 11/22/2024 11:42:31 AM

Plasrefine is a ticking time bomb and if this proposal goes ahead we have no other choice but wait for it to explode.

We will fight to the end to protect our environment. We need to stop poisoning our planet. I'm fighting for not only myself but for my grandchildren and future generations to come. When my family ask us why and how we could allow our environment to be destroyed I will have to tell them that there were some people who made very wrong decisions.

To build such an enormous facility what wildlife will be displaced to accommodate this? Sugar glider, wombats, wallabies, kangaroos, possums and a wide variety of birdlife are probably calling this proposed area home.

A few years ago, we had catastrophic bushfires that not only destroyed homes, humans lost their loves and thousands of animals died or were injured. There are many people in the Highlands who are fighting for the survival of our animals. Too many animals are killed on our roads each day. We have many nocturnal animals who have to cross our roads. We don't need any more trucks on our local roads injuring or killing our wildlife. We are very fortunate to have platypus living in our rivers, they do not need anymore plastic in their environment. Our koalas cross roads to go to different trees, they are slow moving and a truck would pulverise them. Koalas are already struggling with diseases; they need a safe and clean environment to live in which we have provided. Please do not go ahead with Plasrefine. Our animals have enough to deal with without adding more toxins into their environment.

This is not the right site.
