This development is ludicrous. As a recent arrival to Moss Vale I'm horrified to find out about it. Im immunocompromised and elderly . I only socialise outdoors due to Covid risks but I believe residents are advised to limit time outdoors when this monstrosity is operating ??? Do many if us will be housebound . In the event of a fire we would need to evacuate quickly . This is not feasible for so many of us . There would be no way a fire could be dealt with appropriately and quickly so residents would be gravely affected - especially so for immunocompromised. It should be located elsewhere though I'm not sure this is a suitable and well researched way of dealing with plastics environmentally and appropriately . This is a dangerous venture and reeks of hasty decision making not in any ones best interests . The initial process seems fraught and lacking in consideration for anyone except the owners . I find the whole sorry business distressing having recently moved here .
