*The main focus is the unsuitable location of the proposed facility. The area is part of the Council's management plan for the Southern Highlands Innovation Park (the Plan was prepared using a State Government grant)- which aims to have innovative, creative industry present in the Highlands (thereby making for low impact industry while still proving employment opportunities) not a hazardous facility such as Plasrefine would be.*

*The site is too close to schools, preschools and homes, Moss Vale's town boundary and local businesses.*

*The site is near the Wingecarribee River which is part of the Sydney water catchment.*

*Such a facility in the Southern Highlands will also affect tourists coming to the Southern Highlands.*
