Location: <i>New South Wales 2577</i>	
Attachment: N/A	

Submission date: 11/23/2024 1:50:49 PM

The winds that we get are usually from the west so the smell, and fall out from the recycling factory would directly impact our home and health. The fact that hundreds of trucks travelling to and from the factory each day would be a negative impact on the homes, schools and childminding centres that they will drive past and not to mention the impact on our fragile roads. Micro plastics released into atmosphere and our streams will cause damage to our drinking water which also impact Sydney water and more likley kill the platypus we have in our streams. We moved here from Sydney 3 years ago to get away from the pollution, I understand we need these facilities but this is NOT the right site, nothing like this should be built in pristine areas like this.
