*I am writing to formally raise my concerns regarding the environmental impact the proposed plastic recycling facility in Moss Vale, NSW would make. The operations of this facility would cause contamination of local waterways, soil, and air, and I believe immediate action is necessary to prevent these issues and harm to the surrounding environment and community.*

*1. Waterway Contamination*

*Runoff from the facility will enter local waterways, introducing harmful chemicals and microplastics into the water supply. These contaminants pose a serious threat to aquatic life and could affect the health and safety of residents who rely on these water sources for recreational, agricultural, and drinking purposes.*

*2. Soil Contamination*

*The facility's operations will be contributing to the contamination of surrounding soils, degrading the local soil quality and jeopardising agricultural land, wildlife, and public health.*

*3. Air Quality Concerns*

*Airborne pollutants, such as volatile organic compounds (VOCs) and particulate matter, are another concern. These pollutants can have significant adverse effects on human health, especially for vulnerable groups such as children, the elderly, and individuals with respiratory conditions.*

*Thank you for your attention to this critical matter. I look forward to your prompt response and the implementation of measures that will protect our local ecosystems.*
