As a young person who grew up in Moss Vale, I am worried about the locality of the development. It is too close to town and in a residential and light industry area. There are a number of environmental issues such as threats to wildlife (including endangered species), water catchment and a degradation of air quality. This is further impacted by the fire risk.

It would be more appropriate to support sustainable industry (such as with the Southern Highlands Industrial Park) which will also offer employment opportunities or provide more housing so young people do not need to leave the area.
