Dear IPC members,

I oppose the Plasrefine Recycling development being built in Moss Vale for many, many reasons, a few are detailed below:

- The hazardous environmental effects it will/could have on the air and water in our clean, beautiful Southern Highlands, from any fire and escaping micro particles of plastics resulting from a poorly designed processing plant, the chimneys and huge doors opening to allow trucks and other machinery in and out of the facility 24 hours/ 7 days per week.

The air and water contamination will be to the citizens, plant life and creatures of the Southern Highlands, especially those living in Moss Vale, and people/ creatures down stream from Moss Vale using the Sydney water catchment for drinking water.

There are so many reasons not to approve the PLASREFINE development I am feeling overwhelmed, I cannot possibly list them all, but believe the many eloquently detailed objections from experts and ordinary citizens I have heard at the public hearings in Bowral recently along with the many written objections you have received speak for me too.

I vehemently object to the NSW Government and the IPC giving Plasrefine final approval!

The Plasrefine development should have been classed as a Hazardous Industry from the start and never proposed to be built right IN our little township so close to homes and schools without a very substantial buffer zone! .it would hurt and cripple our town in so many ways not only the precious clean air we breath or the local water we drink, (just pronounced the best water in the State or was it Australia? !how ironic!), the huge trucks on our already congested town roadways

endanger us along with their hazardous cargo! .the negative reasons to oppose Plasrefine go on and on! ..

Please, please reject the Plasrefine development in Moss Vale based on the facts.

I have been very impressed by the people of the Southern Highlands and their very sound reasoning and calm manner in mounting our collective opposition to Plasrefine, they/we have not got it wrong, a rejection of the Plasrefine development by you the IPC would be for the best for all concerned even Plasrefine! .they have to find the right site, tell them it is not

Moss Vale, New South Wales, Australia.
