I am a young person who is trying to get ahead and this will devalue my property value. It's hard enough for young people who populate this area to get ahead and this will make resales very difficult as people will be driven away as concerned about the environmental impacts. The roads out to the Hume Highway are single lane country roads and the impact from the trucks will be significant. The environmental damage with microplastics into the waterways would make me want to move from this area as I don't want to raise my kids with this pollution and health risks. There are residential areas all around this development and it is not appropriate to build such a processing plant.
