My objection is based on deep concerns on every aspect relating to the proposed site of Moss Vale for the Plasrefine factory. One major concern is the environmental impact this reprocessing factory will have on the Southern Highlands area in general, and specifically, air quality, water quality, impact on wildlife, noise pollution traffic and what lasting affect this will have on our young children. Above and beyond this is the unknown environmental impact to the area should site accidents occur eg chemical fires, explosions. This regional area is not equipped to manage any fire emergencies that may occur.

Also the negative economic impact it will have on tourism, small businesses and property values, cannot be underestimated. The government needs to find another solution, Moss Vale is not the answer.
