Submission ID: 217941

Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses), Traffic</i>
Location: <i>Redacted</i>	
Attachment: N/A	

Submission date: 11/25/2024 7:21:46 AM

I can't believe that I'm actually doing this. I feel like I need to hand out marbles to you lot because clearly you all have lost yours! We are a rural community which generates a lot of sales for the government through tourism, house prizes including sales and taxes. This will be affected because no one will want to come to a place where toxic chemicals will be living in our grounds and the smell will forever be lingering, not to mention the amount of traffic in an already congested environment.

Put that aside for a minute and let's talk about the environment factor! This is a ploy to get another international agency owning our land which they will do what they want because they are not living here. They say it's to save the environment but in fact with the amount of trucks on the road it's quite the opposite. A 24 hour truck rotation will complete destroy our entire community, can you not see that? Again marbles!!! Let's say the site catches on fire like so many other which have, we are so close to schools, towns, homes and natural resources that it will take upto 6 hours to contain the fire if it dosent spread (based on other sites) and what if someone dies in the process can you image the lawsuit you will have on your hands because it's sooo close to our town.!! [REDACTED] The legal factor alone should be enough for your all to say no! Why is our government so scared and is always made to look like a [REDACTED] fool. [REDACTED]

Did you know that plastic will live in the soil for a very long time, it's highly dangerous for kids, animals and our environment. You can surely think is is a good idea. We don't need it here in our shores and sure as hell don't need it in our community.

The only thing this Beligun company want to do is use our land cause they bloody don't have any left in there's to make plastic fabric to support their low cost manufacturing process and they are using you guys to allow this to happen in our shores! Grow some and say no mate!!!
